EVERYTHING YOU NEED PACKED IN ONE KIT

More and more electrical contractors are adding data logging to the range of services that they can offer to their customers. So, Chauvin Arnoux have created the Contractor's Kit. We have combined the top of the range PEL104 power and energy logger with all the current sensors, leads and software that you need, all enclosed in a rugged case to keep it safe in your van or on-site. However, as with all Chauvin Arnoux products, what's outside the box is just as impressive! You get access to Chauvin Arnoux's unrivalled technical support and huge range of videos, guides and articles to get you up and running in no time.
